

2019 BEND MUNICIPAL AIRPORT MASTER PLAN

2019 Bend Airport Master Plan Overview

The Bend Municipal Airport is one of the busiest general aviation airports in Oregon with annual operations that are approaching 140,000 per year. The airport's rapid growth paired with the recent completion of important development projects has lead the FAA to require that the City conduct an update to the 2013 Airport Master Plan. The new plan will give the City and users the opportunity to plan for the next 20 years at the airport.

Planning Advisory Committee (PAC)

As part of the Bend Airport Master Plan Update the planning team will conduct up to five (5) Planning Advisory Committee (PAC) Meetings with a select group of airport tenants, pilots, local & regional economic development interests, neighbors of the airport, and staff/representatives of the City and/or County to ensure a collaborative public involvement and master planning process that develops understanding, explores solutions, and provides a realistic and achievable implementation plan.

Public Open House

The open house is an opportunity for members of the public interested in the Airport Master Plan to review relevant information and provide a forum for neighbors and stakeholder groups to discuss the project and provide input.

PAC Meeting #1 and Public Open House

PAC Meeting #1 will be an interactive discussion between the PAC and Planning Team to develop a comprehensive understanding of the existing conditions of the Airport and aviation industry, identify and discuss any potential issues and opportunities, and establish the framework and outlook for finalizing the aviation forecasts that will ultimately be submitted to the FAA for approval.

The Open House, which will follow the PAC meeting, will be an open forum held at the Airport to provide an opportunity for interested citizens to review and comment on the work completed to date.

APRIL 25, 2019
