

Franklin's Corner Community Garden Agreement

2024 Growing Season

Franklin's Corner Community Garden is the first community garden built on City owned property. Our use of this land depends on our ability to keep the garden and neighborhood relationships well maintained. The garden and surrounding property will be maintained entirely by volunteers, gardeners with plots and supported by donations and sponsorships. All fees collected for plots will go to offset the cost of irrigation.

The Franklin's Corner Community Garden will provide the following:

- ✓ A garden plot to grow produce and/or flowers for harvest by plot holders
- ✓ Access to water for irrigation
- ✓ Compost bin and/or an area for disposal of garden waste
- ✓ Plenty of new friends

PART 1: LEASE REQUIREMENTS, PAYMENT AND PLOT AGREEMENTS

Term

This term of this agreement is for the 2024 gardening season. The agreement takes effect on the date it is signed by the gardener and terminates on the last day of the growing season on November 10, 2024.

Fees and Securing a Plot

Fees are \$15 for an accessible half bed or \$25 for a full bed. Fees must be paid during community garden registration and are non-refundable and non-transferable. Any plots for which agreements and fees have not been received by opening day on May 4, 2024, will be released to those on the waiting list if the respective gardener is not present for opening day. Starting on opening day, gardeners can begin gardening at Franklin's Corner Community Garden (FCCG) after reading and signing this agreement and paying the applicable fee at registration. Please notify the garden manager at community@worthyenvironmental.org if you are not able to attend opening day and we can make alternate arrangements. Gardeners WILL have to sign a waiver before they are able to work in the community garden.

Each gardener agrees to support FCCG by doing their fair share of common work to help make this community garden successful. Gardeners will volunteer at least one hour per month, in a contract period. Examples of volunteer activities: Participate in harvest, deliver harvest, weed common areas, turn the compost pile each week, seasonal garden cleanup effort, applying mulch in common areas, etc. Youth participation is encouraged with adult guidance.

Gardeners will accept shared responsibility for maintenance of the common areas, furnishings, and equipment, including fencing, trees, compost bins, and tool shed.

The garden is open from dawn to dusk seven days a week. The combination for the lock will be given only to members who have signed the gardener's agreement and will be changed annually or as needed. Please do not share the combination with individuals who have not signed this agreement. If you are not sure whether someone has signed the agreement, check with the garden coordinator.

Choosing a Plot

Plots are assigned on a first come/first serve basis. Gardeners who have previously gardened at the site are given preference, as are members living in the Larkspur and Orchard District areas. Garden plots are assigned to one person only and are not transferable. Others may garden at your site, but the

responsibility for payment of fees, cleanup and other duties at the site will be the responsibility of the individual whose name is assigned to the plot.

You can request specific plots, but please remember that since it is a first-come, first-served program, you may not get your first choice. Reserving more than one garden plot is not permissible.

A waiting list will be maintained for applicants for whom no plot was available.

Start of Season

The season will begin May 4, 2024, weather permitting. Irrigation will not be turned on until safe to do so. If the kind of plants you are growing must be planted later, weed your plot as needed before irrigation is turned on. You are responsible for your plots for the entire season. Keep it free of weeds and harvested through November.

The planting deadline is June 4, 2024. Plots that are unplanted by the planting deadline are assumed abandoned and will be forfeited without a refund and will be reassigned.

Plot Maintenance Expectations

Gardeners must maintain plots (including adjacent aisles) throughout the growing season. Gardeners who do not maintain their plots will not be eligible for a plot in the following year. Maintaining includes: planting, watering, weeding, harvesting, and end of season clean-up. Gardeners will keep weeds down and maintain the areas immediately surrounding their plot.

Each gardener is expected to spend time each week working on their plot and the surrounding area.

Please contact your garden coordinator if you will be moving, taking an extended vacation, or otherwise will be unable to maintain your plot throughout the summer. Or if, for any reason (health, vacation, work pressure), you will be temporarily unable to maintain their plot. If you have a substitute gardener, inform the coordinator. Any substitute gardener must submit a signed gardener agreement before accessing the garden. Any plot abandoned for more than 2 weeks, without having given prior notice (i.e. of vacation, sickness, etc.) to the garden coordinator, will be forfeited. At that time, it will be re-assigned or tilled in and any produce will be donated to charity.

Unclaimed or Neglected Plots

Unrented, abandoned, or uncared for plots will be reassigned mid-season. They will be offered to existing gardeners for fall planting only. They will be open for new gardeners in the following season. Gardeners may also elect to share a plot for a local food bank.

End of Season

Plots must be cleared and cleaned at the end of the growing season which is November 10, 2024. Gardeners who do not clean their assigned plot will lose first right of refusal for the plot the following year. Irrigation will be blown out and turned off at the beginning of November. In the event of a warmer than usual fall, gardeners must first have pre-approval from the garden coordinator to allow crops to remain after the November 10 deadline. Plots provided extensions must be fully cleaned out before adverse weather ends the season.

Cleaned up means plot is ready for tilling, clean and level. All dead plants and weeds should be removed. All stakes, structures, materials must be pulled and removed from campus. No personal items are to be stored on site. Cover crops may be left on cleared and level plots, with preapproval from coordinator.

Gardener Meetings

The garden coordinator may hold garden meetings as needed throughout the growing season. Garden meetings will be held in compliance with federal, state, and local health guidelines. Gardeners agree to use their best efforts to attend any garden meetings or on-site group work parties that are held.

The bulletin board is for garden business only, soliciting is not allowed. Feel free to give notes on the bulletin board in the shed for any useful hints and ideas.

Any suggestions for feedback or questions should be directed to the Garden Coordinator.

Community Service/Volunteering

Gardeners understand that this is a community garden and in order for it to succeed gardener support is needed to maintain the site, manage compost, keep on top of equipment, make signs, deal with wildlife, obtain our donated transplants, plan and execute produce giveaways, and help keep site picked up from debris.

Gardeners are encouraged to work together on communal aspects of the garden at the beginning of the planting season. Gardeners agree to volunteer 1 hour per month toward community gardening efforts such as organized work sessions as well as spring and fall cleanups. Organized work sessions focus on maintaining the community areas of the garden and not your own plot. This will also be the time to discuss members' ideas and concerns. Gardeners who do not maintain the online volunteer work log will not be eligible for a plot in the following year.

Report completed hours in a timely manner via the link sent by garden coordinator monthly. All service hours must be completed and reported by November 10, 2024. Gardeners who have not completed and reported required service hours will not be eligible for a plot the following season.

PART 2: GARDENING RULES

The rules and regulations are in place so the FCCG garden can grow, provide a healthy community atmosphere, and function as a pleasant place to garden. All gardeners must sign this agreement before entering the garden. Gardeners are further required to adhere to the terms of this agreement and any other applicable City of Bend policies and rules. Gardeners are expected to take an active role in administering the gardens.

You will be required to forfeit your plot if you or anyone gardening your plot ignores garden rules. As outlined below, these are the conditions under which immediate plot forfeit will occur:

- Bringing alcohol and illegal substances into the garden
- Plot is not maintained for two weeks
- Without FC CG staff approval, transferring or subletting of a plot
- Violation warning is ignored or violation is repeated
- Act in a threatening or abusive manner to other gardeners

One's Plot Organic

Gardeners must agree to garden organically. This means synthetic fertilizers, pesticides, herbicides & rodenticides may not be applied. Organic definitions can vary and organically labeled pesticides can actually be as toxic as or even more toxic than synthetic versions. However, using compost, barriers and weeding are always acceptable. Gardeners agree to check with garden coordinator before applying any fertilizers, pesticides, herbicides & rodenticides, even if labeled "organic". Do not use synthetic chemical pesticides or fertilizers like Miracle-Gro. If you are not sure if something is allowed, please check with another gardener or contact the volunteer garden manager.

Weeds and Disease (see also "Compost and Trash")

Gardeners agree to keep the garden & garden edges free of weeds, diseased plants, insect-infested plants and over-ripe vegetables.

As a community garden, please respect the surroundings and tend to your plot and help keep the area free of litter and weeds.

Diseased and infected plants, as well as weeds that have gone to seed, must be removed from the garden and disposed of in the yellow bags provided by the City. Seed-free weeds, if removed from your plot, are to be hauled to the compost site.

Keep your garden neatly weeded on a regular basis. Weeds may not become taller than 8 inches. Weeds are a major complaint of neighbors and other gardeners and are the leading cause of plot forfeiture.

Large/Woody Plants or Structures

Do not plant trees or shrubs. If it's woody and perennial, it's not allowed in your plot.

Be respectful, tall crops (such as sunflowers and corn), structures, trees, etc., should be planted to not shade another garden or crops.

Perennial or potentially invasive plants such as raspberries or mint must get the okay of a majority of gardeners at the annual meeting. Potatoes and Corn may be planted in the perennial garden.

I understand that it is my responsibility to maintain plants within the limits of my plot and to keep vegetation less than four feet in height, so as not to shade neighboring plots.

Structures

No altering the dimensions or elevation of the plot, frame or of the surrounding area. No alteration of the installed irrigation system. Irrigation is expected to remain within the plots throughout the growing season.

The gardener supplies the materials and labor for non-permanent structures.

Simple trellis structures are permitted if they do not shade other gardens or block irrigation if using a shared bed. DO NOT use poured concrete for anchoring. Neither solid walls nor solid roofs are permitted.

Row covers are permitted. Please anchor them to prevent blowing away (do not use rocks from the surrounding landscape), and store them when not in use, never allow them to enter the walkways. You are responsible for damages should your cover blow into another plot. Cold frames are permitted if they are no larger than 30 inches by 30 inches by 60 inches and covers are made of sturdy plastic - not glass.

Making Good Plant Choices

Gardeners may grow a wide variety of fruits, vegetables, herbs and flowers. Choosing from among the wide range of plants for the garden is challenging and fun! The guidelines below will help you make good choices for gardening in a community garden plot program. Talk to your gardening neighbors to share ideas for good plant choices for success.

Perennials such as asparagus, rhubarb, and many desirable flowers are permitted in the perennial garden. Divide them as needed to manage their size. Take them with you when you leave the garden plot program.

Herbaceous vines are permitted. Seek your neighbor's permission to grow them on a common fence.

No plants on the Deschutes County Invasive Plant List, **Noxious Weeds | City of Bend** (bendoregon.gov), may be grown. Many of these are weeds in areas surrounding the garden plots. Please control them as much as you can.

Some desirable plants can be weedy, such as raspberries, blackberries, mints, morning glories, and fennel. Please keep these plants 1 foot or more away from plot boundaries. Grow plants like mint in pots to contain them. Remove and throw away seed heads before the seeds ripen. Take the plants with you when you leave the garden plot program.

Gardeners may plant a fall crop or cover crop after the summer season.

Soil Amendments/Remediation

Don't bring in sand or gravel. These materials are difficult or impossible to remove later, and the soil is already quite sandy and well-drained.

All rocks should be removed from the garden area and piled in the labeled areas. Rock borders are not permitted, including the outside flower beds. Do not dump rocks in the path.

Mulch

Using mulch in your garden plot has many benefits. As organic mulches break down, they add valuable nutrients to your soil. You will need less fertilizer. They also help conserve water.

Organic mulches, such as compost, leaves, straw are highly recommended to conserve water and add nutrients to the soil. Do not use straw types which may sprout on the beds.

Non-biodegradable mulches, such as stone, carpet, and artificial turf, are prohibited. Plastic and porous weed blocker covers are permitted but need to be secured to the ground to prevent them from blowing away.

Composting plant materials within the plot is an excellent way to reduce trash and conserve nutrients. Do not compost food scraps (such as meat, oils, or fat), as this attracts animals.

Avoid fresh manure which may contain weed seeds, smells bad, and may have sanitary issues that could affect neighboring plots. Composted manure is permitted.

Adjacent Paths & Borders

Gardening activity and plant growth must be restricted to the gardener's plot. Please prevent vegetation from encroaching onto walkways and adjacent plots.

You are responsible for maintaining half of the path next to your plot. Paths must be kept clear of weeds, large rocks, garden plants and other obstacles, including tools and garden materials. This includes plants overhanging from your plot. Both the access and perimeter paths must be free of garden materials and debris so as not to create a hazard nor to impede their maintenance.

Please be considerate of plot aisles, which are needed for hose and water movement.

The assigned garden lots have been established with access paths between them to provide access for all gardeners. Access paths should be no less than 4 feet wide. When planting near paths, leave adequate space for plant growth so as not to encroach into or overhang the paths. Do not place opaque structures where they will shade a neighboring plot.

Watering

Gardeners need to be diligent in shutting the water off after use. Be mindful of water usage. Gardens will be managed for best practices in water conservation.

Spigots must be shut off after use. Please refrain from watering your garden with an open-ended hose. The use of a hose nozzle will conserve water and maintain sufficient water pressure for other gardeners. Additionally, if a watering ban is in effect, please comply with regulations. Roll hose up completely after use and confirm that the spigot is turned off.

No overnight watering. Water hoses must not cross other plots and must be attended at all times. Water sprinklers are not permitted in the garden.

Water use is limited to 5 minutes per plot per day. Please help avoid water loss in the aisles and be considerate of other waiting gardeners.

Irrigation is provided and programmed. Never access the irrigation control panel unless there is an irrigation emergency. Report emergencies to Garden Coordinator. Gardeners must also report all leaks.

Garden Site – In General

Gardeners will not make any permanent changes to the garden, such as adding an underground watering system or drastically changing the elevations or soil of the plot.

Gardeners agree to get approval from garden coordinator to plant trees, shrubs or bushes (non-herbaceous plant material that does not die to the ground every winter). Any approved trees, shrubs or bushes, or other approved plant material become property of the garden.

Electric fences are not permitted in the garden. Small wire fencing is permissible to keep garden loving creatures from invading. Please exercise caution, if utilized, to not damage the underground irrigation lines and do not attach it to the wood frame.

No digging for worms anywhere in the garden.

Glass containers are prohibited from the gardens. In addition, containers, bags, etc., of any kind should be secured so as not to blow around and/or detract from the orderliness of the gardens. Such items are best removed when they are no longer needed.

Compost and Trash

Gardeners will sort all waste from their plot and adjoining paths into compost, recyclables, and trash. Compost can be processed at the site; recyclables and trash must be taken off-site. Gardeners will place diseased and insect-infested plants in plastic bags and remove them from the site. Please do not utilize the trash can provided by Bend Parks, which is for the trail system.

Compost makes excellent mulch; the use of plastic and other non-porous materials for ground cover is prohibited. Compost material should be put in the compost bins and not left in a heap that someone else will have to clean up. Gardeners are expected to put weeds on the compost pile.

Other Garden Plots

Pick only the plants you are growing or have permission from the grower to pick. Stay out of other people's plots unless specifically invited.

No gardener can give permission to anyone to go into anyone else's plot for any reason only the gardener who that plot is assigned to can do that. Gardeners will not plant, weed, water or harvest from any other member's plot.

While you may view the success of other gardeners, refrain from stepping off the access paths and into other garden lots. Gardeners have their own methods of planting, which may be damaged in the process.

The urban food forest (fruit trees) exterior of the community garden is for sharing with the entire neighborhood. Everyone will be allowed to harvest only what they can use for a single meal. Large scale canning projects will be excluded from harvesting from the food forest.

Property: Tools and Equipment

All use of tools and equipment is at your own risk (insurance requirement). No personal tools may be left in the shed. All tools belonging to the community garden should be returned to the tool shed when not in use and never left in or around your personal plot or on walkways.

Garden Gates. The last gardener to leave the garden regardless of the time of day should securely close the gates. Never prop the gate open or share the code for the lock with parties who do not have permission to access the garden. Personal garden items: Personal tools, pavers, bricks, stakes, cages, fencing material, etc., used in plot during season will be removed from the site by the plot renter after each use.

Gardeners, Family, and Pets Gardeners

Gardeners agree to take breaks, snack, or informally gather within the garden areas only. Gardeners agree not to use adjacent neighbor's lawn.

Be considerate of the garden's neighbors. Whenever possible gardeners are encouraged to walk, bike or to take the transit system to the garden to lessen the impact of additional vehicles in the neighborhood. Do not block access to their driveways or walk through neighbor's lawn to access garden. Gardeners will respect the privacy of the garden's neighbors and do my best to preserve their quality of life. Gardeners will not ask neighbors to provide use of telephones (excepting emergencies) or restrooms. Gardeners are reminded to use good personal safety practices when visiting the garden. Keep the garden attractive for neighboring residents and safe for all. Place bags and other objects in a neat and orderly way in your plot and keep them within your plot boundaries.

In the spirit of cooperation, all gardeners shall treat the garden, other gardeners, neighbors, and visitors with respect and consideration. No stealing (harvesting from others' plots without authorization), verbal or physical harassment is allowed. Violation of this rule will result in expulsion from the garden. Gardeners are expected to communicate with neighboring gardeners to work out borders, weed issues and size of plant issues.

Radios. Should you wish to listen to the radio, please use headphones so as not to disturb the tranquility at the garden. Growing illegal or regulated plants in the garden will lead to immediate expulsion with no return of plot fee.

Smoking, chewing tobacco, illegal or regulated substances and open flames are not allowed in or around the garden.

Gardening workshops may be held periodically throughout the year; however, it is the gardener's responsibility to research proper gardening techniques. The essence of community gardening is trial and error and sharing of knowledge. Numerous desert gardening books are available in stores and libraries, and the OSU Extension offers a wealth of information.

Children

Children are welcome at the garden when accompanied and fully supervised by an adult.

Parents are encouraged to bring children to the garden and introduce them to the wonders of gardening. Please monitor their behavior and whereabouts at all times. Teach young children to stay on paths and that climbing of trees or fence is not allowed.

Pet Animals

Dogs. Should you wish to bring your best friend to the garden, please remember that city ordinances apply to this campus. Dog should remain on leash under owners' control and feces pick up is required at all times. Do not allow dogs to urinate on trees or vegetation surrounding the garden area. Under no circumstances should dogs be permitted into the gardening area bed areas because of potential disease from dog feces. Service dogs are permitted.

Miscellaneous

Vegetables from garden plots may not be sold for personal profit.

Excess produce should be delivered to those in need. You may also wish to deliver to your favorite charity.

Keep the Garden Coordinator advised of your current address and telephone number. Please notify the Garden Coordinator of any change of address or telephone by email

community@worthyenvironmental.org.

Gardeners give permission for the release of any photographs taken of themselves or their family at the garden to the media or for use for garden purposes.

PART 3: WARNINGS AND PENALTIES

The Consequences. If you fail to follow any of the above guidelines, the garden coordinator will contact you and give you a reasonable amount of time to correct the problem. If you do not respond, your plot will be considered abandoned. Plantings will be removed from abandoned plots and the gardener will not be eligible to return the following year.

All gardeners are required to keep their plots as disease- and weed-free. If a garden is not maintained, a warning will be given. If conditions do not improve, the garden will be forfeited.

Complaints, policies, and mediations are the responsibility of the community garden coordinator, who has the final say.

PART 4: GARDENER'S SIGNATURE & LIABILITY WAIVER

I will not make duplicate keys of any locks on the premises or give out the key or lock combinations to any other person.

I will work to keep the garden a happy, secure, and enjoyable place where all participants can garden and socialize peacefully in a neighborly manner.

I understand and willingly accept the inherent risks in gardening. I understand that use and misuse of gardening tools may result in injury. I am aware that soil and food-borne diseases, though rare, may be contracted through gardening or consuming undercooked food.

I understand that, as a participant in the Franklin's Corner Community Garden, I am a guest and that my privileges may be revoked in the event that I fail to comply with the terms of this Agreement.

During the growing season the following procedure will be initiated in the event of failure to comply with the terms of this Agreement:

- The Garden Coordinator will issue a verbal or written warning.
- If no response or correction has been made within three days of the verbal warning, the Garden Coordinator will issue a second written notice by email.
- If no response or correction has been made within seven days of the second written notice, the Garden Coordinator will issue a final written notification indicating that gardening privileges and the plot have been forfeited.
