

WaterWise Irrigation

- Make sure irrigation watering days are set to City of Bend's Even /Odd day schedule.
- Ensure irrigation runs only during the City's approved irrigation hours.

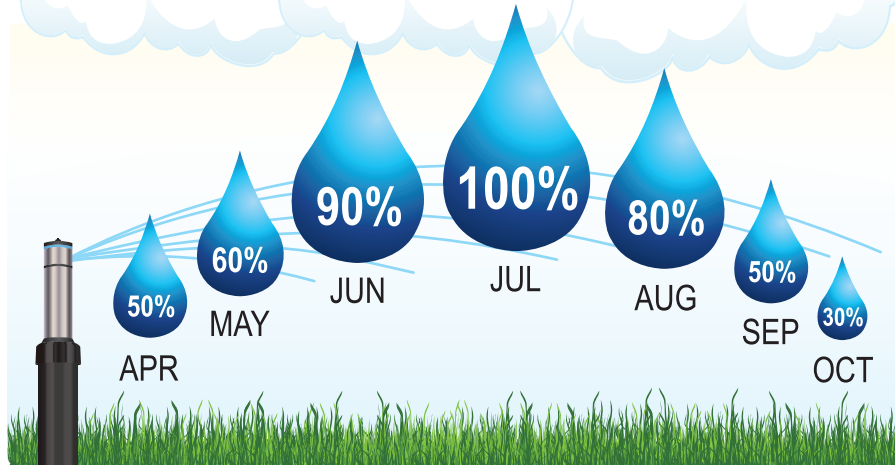

Odd Water Days

Even Water Days

UTILITY DEPARTMENT

Seasonal Adjust is a MUST!

- Set your controller for peak season (July-August) and use the Seasonal adjust / Water budget % feature to make changes to runtimes throughout the season. Typical settings for the Bend area are seen above.
- Inspect your irrigation system for leaks frequently by running each station.
- Adjust sprinkler heads so all irrigation stays on your property and off streets & sidewalks.

Saving Water in the High Desert

Daily Runtimes for July — Even / Odd Day Schedule

Sprinkler Type		 Spray	 Rotor	 Rotary	 Drip
Plant Water Need	High 	19 Minutes	51 Minutes	64 Minutes	—
	Moderate 	12 Minutes	40 Minutes	36 Minutes	15 - 30 Minutes
	Low 	4 Minutes	20 Minutes	16 Minutes	10 - 20 Minutes

- If your landscape requires longer runtimes, make improvements to the efficiency of the irrigation system.
- Cycle / soak irrigations by splitting total runtime in half and program a second start time to minimize runoff.

CONSERVE IT!

Log into your **WaterSmart** account to find out how much water you use.
