CITY OF BEND

Submit completed form to: engineering@bendoregon.gov or Project Manager/Engineer. This deviation is to be provided to the City of Bend to review an individual need to allow a deviation to a City Design Standard due to conflicts with existing conditions and/or topography. Cost of improvement is not typically an approvable reason for a deviation approval. All variances/waivers to the Development Code must be processed with the Planning Division. With approval to a deviation, it does not grant the continued deviation on other projects or future project phases. Approval of the deviation will be determined through review by the City Engineer once this application has been received.
