

PORTLAND AVENUE PROJECT

NW COLLEGE WAY TO WALL STREET

The City of Bend’s Transportation System Plan (TSP) identifies a \$17.7 million Portland Avenue Improvements Project to address:

- **Multi-modal Transportation**
- **Safety Improvements**
- **Connectivity for Bicyclists and Pedestrians**

The voter-approved 2020 Transportation GO Bond funding incorporates only a portion of the planned improvements (\$3.5 million), serving as a limited funding first phase of this project, providing improvements focused on the goals as outlined to the right. The fully funded project (\$17.7M) as identified in the TSP is not scheduled or funded at this time.

The improvements from Ninth Street to the Portland Avenue bridge may be built as a synergy project concurrent with the Awbrey Butte Waterline Improvement Project. The areas west of Ninth Street and east of the Portland Avenue bridge may be constructed under separate projects.

Learn more at bendoregon.gov/awbrey-waterline.

PROJECT GOALS

Safe crossings at key intersections

Continuous **sidewalks**

Intersection **safety**

Vehicle **speed reduction**

Better connectivity for neighborhoods and destinations

SPRING 2023

Alternatives analysis

SUMMER 2023

June 27, 2023
Community meeting to review suggested improvements and provide feedback

FALL 2023

Community informational meeting for preliminary design of suggested improvements

WINTER 2024

Community informational meeting regarding pre-construction

SPRING 2024

Construction anticipated to begin
