Subject: Bike lanes

To whom it may concern:

Please address the needs for protected bike lanes and consistent bike lanes. Too often, when bike lanes exist, they only run for a short distance before abruptly terminating. This creates a very dangerous situation for cyclists, especially on narrow roads like Eagle Rd on the east side of Bend. Vehicle operators pass in unsafe situations ( and the road itself is crumbling away ) on many roads without bike lanes. I have heard many people say they no longer feel safe on our roads and so have given up cycling to do errands, commute or just recreate.

Please address these issues in the cause of safety.

Thank you,  
Pamela Kelly
