Subject: I support a just and sustainable transportation plan for Bend

Hello,

As Bend grows, our climate and transportation sector changes. Bend must adapt and lead with what's next in urban/semi-urban transportation options while focusing on equity and the elimination of fossil fuels. Thus, I urge my city to work towards the progressive and just options outlined by many local groups. We can move Bend forward while decreasing traffic and sustaining the health of our planet.

Thank you.

Cooper Morrow
