Subject: Healthy Transportation System for Bend

As the date for some important decisions nears, I wanted to once again voice my strong support to the CTAC for investments in walking, biking, and transit. The health of our community and planet depends on meaningful action to encourage people to limit exclusive use of automobiles.

In particular, I hope that you determine that all bike/pedestrian Key Route investments will be moved into the near-term priorities list and that all three midtown connectivity projects (Greenwood, Hawthorne, and Franklin) remain near-term priorities.

Thank you,
Connie Peterson
