**Subject:** CTAC: In support of Pedestrians, Bikers and Public Transit Riders in Bend

I appreciate the CTAC's efforts to invest in a friendlier city for walking, biking and public transit. There are so many wonderful things about living in Bend - making it easier to get around without a car will only increase our quality of life as residents. Long term benefits include healthier air and a cleaner environment here in central Oregon.

Our family would like to see that bike and pedestrian Key Route investments are made near-term priorities by the CTAC - Especially all three midtown bike and pedestrian connectivity projects.

Thank you for improving life in Bend by supporting more pedestrian, biking and public transportation options.
