**Subject:** Transportation System Plan

As a resident on the East side who would like to bike more with our family, we do not feel our current infrastructure is safe enough to do so.

We support investments in all forms of transport, but biking and walking need our focus, and should be a priority. We would like to see all three midtown bike/pedestrian connectivity projects be a priority that gets funded soon. Having traveled to Amsterdam and seeing there amazing bike path systems that save on fossil fuels and put riders at a safe distance from automobiles I know we can and must do better.

Sincerely,  
Amanda Larkin, Joe Kirby & Riley Kirby
