City to begin chip seal street surfacing

The City of Bend will begin chip seal street projects on Aug. 25. There will be limited access to homes and businesses during the construction process. Streets being treated will have personnel directing and controlling the flow of traffic through the work zone. Delays and temporary closures should be expected.

The City requests that residents do not park anything on the affected streets until the project is complete. Vehicles may be towed. If your yard irrigation waters the street, please turn the system off until the project is complete. In addition, keep your pets away from construction activities.

Project start dates are subject to change due to unseasonably cool or wet weather or equipment problems. Visit the www.ci.bend.or.us homepage for schedule updates.
