Subject: Transportation Advisory Committee

Karen,

[REDACTED] I just saw an article about the upcoming December 11th Transportation Advisory Committee making decisions about which projects will move forward as regional priorities. I would like to see a connected bicycle network added to the list. Also consider updating metrics for how well our system performs to better take into account other goals (including safety, access to employment, availability of transit, biking, and walking, and cost to build and maintain) and not just "how long a car has to wait at an intersection."

Thanks! Peter

Peter Geiser
