## Infrastructure Advisory Committee (IAC)

---

### **August 6, 2014 IAC recommendation regarding the Stormwater Master Plan**

The Infrastructure Advisory Committee (IAC) has reviewed and discussed the Stormwater Master Plan on 2/28/11, 8/13/12, 3/24/14 and 6/23/14. In March 2014, the IAC heard an overview of three different Stormwater Master Plan Infrastructure Approaches and provided a recommendation to the City Council for inclusion of Approach 3 with associated rate structure in the revised draft Stormwater Master Plan.

The IAC has reviewed the revised public draft Stormwater Master Plan (May 2014) along with the public comments received on the draft and finds the proposed Stormwater Master Plan will serve as a good first formal oversight plan for addressing stormwater quantity and quality issues in Bend. Additionally, it provides an overall strategy for addressing drainage infrastructure improvement needs over the twenty-year planning period.

The IAC recommends approval of the proposed Stormwater Master Plan.
