

# City of Bend Infrastructure Advisory Committee (IAC)

---

## **February 14, 2011 IAC recommendation regarding City's Transportation Improvement Bond Measure Project Prioritization Recommendation**

The Infrastructure Advisory Committee unanimously recommends 'Option A', with the addition of a traffic circle at Mt. Washington / Simpson, as the project list for the transportation improvement bond measure.

The Committee recognized that adding the Mt. Washington/Simpson roundabout created a project list that could potentially raise the total project list to \$32 million, and as a result recommended that the lowest priority in Option A should be 14<sup>th</sup> Street. They unanimously agreed, however, that it should remain on the priority list either through cost savings or by phasing the project.

Additionally, the Committee unanimously recommends that the Council maintain the current General Fund allocation for Street Maintenance in the 2011-13 biennial budget.
