I am writing to protest the idea of converting 27th street into a 5 lane thoroughfare. This would really impact the safety and liveability of the neighborhood considering the high school, church, and all the people who walk/run along 27th. The noise level is another issue altogether! A 5 lane road conversion would really be a detriment for all NE Bend residents! We will already see an increase of traffic with the Empire connector.

As an alternative, I strongly support making Purcell connect all the way through from 20th to Butler Market as another throughway to help with traffic flow. PLease help keep NE Bend liveable! Thank you.
